An alternative to grinding wheels

CC-GRIND ROBUST can replace grinding wheels, flap discs and fibre discs and provides better value for money and improved ergonomics

In keeping with the motto “PFERD champions – unique tools for any task”, PFERD is pleased to present the CC-GRIND ROBUST grinding disc as the “Champion when it comes to stock removal”.

CC-GRIND ROBUST is the modern, high-performance and ergonomic alternative to grinding wheels, flap discs and fibre discs. It features the VICTOGRAIN high-performance abrasive grain and thus offers users the highest stock removal rate and fastest work progress. The glass-fibre-reinforced plastic backer guarantees a robust, reliable application.

CC-GRIND grinding discs have been optimized to provide a more ergonomic design than traditional grinding wheels. There is much less noise, vibration and dust when using the tool and a considerably superior surface quality is produced. When compared against flap discs, the tool's dimensional stability also enables it to achieve flat surfaces, and it can be reset/trimmed easily. Different versions are available, offering the perfect tool for virtually any application as a replacement for a grinding wheel.

Grinding discs from the CC-GRIND range are used for work on weld seams and for surface grinding, chamfering and deburring, as well as for levelling butt welds on various different materials.

About PFERD

August Rüggeberg GmbH & Co. KG – PFERD Tools (www.pferd.com) is among the leading companies that manufacture tools for work on surfaces and metal cutting. With a heritage that dates back more than 220 years, the family-run business, based in Marienheide, manufactures its products across nine different production facilities and its current portfolio includes over 11,000 tools.
